

English – Pupils will be looking at persuasive writing and create their own article and poetry looking at WWII and the conditions and create their own WWII poem.

Computing – Pupils will be introduced to programming in Logo. Logo is a text-based programming language where pupils type commands that are then drawn on screen. Pupils will learn the basic Logo commands and will use their knowledge of them to read and write code.

History – How lives have changed for children. Pupils will cover Tutor and Victorian times. They will understand working conditions in these times and identify leisure activities and compare them over times.

Music – Pupils will be focusing on identifying rhythm and pitch in a variety of different compositions and using this in their own compositions.

Religious education – Pupils will be looking at the story of Noah from Genesis and making connections between promises in the story of Noah and promises that Christians make.

Physical Education - Pupils will be developing their abilities within Trampolining and creating a sequence focusing on different types of jumps, twists and ways to land.

PSHE & British Values – Pupils will look at living in the wider world. This will include understanding the importance and impact of respect on our learning, development and relationships. To understand Maslow's hierarchy of need and how that may relate to our own wants, needs and priorities. To understand the importance of self-esteem and how to build it up, to be able to recognise the causes of low self-esteem.

Term 3 Provision map

Outdoor Education – Encouraging pupils to learn bushcraft skills provides countless benefits, including resilience building, fostering a love for nature, and developing practical survival knowledge. These eight essential skills – fire lighting, outdoor cooking, shelter building, outdoor first aid, plant identification, trap building, target sports, and camouflage and concealment – will equip them with valuable life skills while instilling a deep appreciation for the natural world.

Maths – Pupils will be looking at multiplication and short division. Pupils will be able to problem solve using multiplication and division. Pupils will understand fractions and calculate a fraction of a quantity, building on understanding from previous years.

Science – Pupils will be looking at sound and understand how we use vibrations to hear. Pupils will look at Data Collection on observing living organisms in my local area, Electricity and Energy learning to build a draw series of circuits.

Geography – Pupils will be able to describe different types of settlements and identify the human and physical features in the local area.

Art & Technology – This term we are looking at light and dark. We will develop our painting skills including colour mixing, painting on a range of surfaces and with different tools. We will be exploring the interplay between different media within an artwork.

Modern Foreign Languages – Pupils will learn to count read and write numbers to 30 in French. We will also learn to say, read and write the date, months of the year and seasons in French.
